

Bacstel-IP system for Windows Release 2.1.0.0 update installation

This is a major update to the Grange Bacstel-iP system for Windows.

It is required to meet the new communications requirements of the Bacstel-iP service and also to support current versions of Windows 7, 8.1 and 10.

The installation instructions are contained in the zip files along with all the new release objects.

Important Notes:

Prior to installing the new version you must contact your Bank (BACS liaison) to do the following:

Advise the Bank that you are installing a new version of the Bacstel system with a new package ID. Give them the following information –

Supplier Grange IT Limited
Package Grange Bacstel-IP for Windows
Package ID SFP9056

Request that this package is in addition to the existing package.

In addition you should check the version of the Gemalto eSigner software on the PC's. Gemalto eSigner **must** be at release 6.3 or later. You are strongly advised to ask your Bank for the latest release of Gemalto eSigner in any case.

To check the Gemalto version, go to www.grangesystems.com then to the Support page, and download the document '*Determine the version of Gemalto eSigner software on PC*'.

Please download the zip files into a temporary location and review the installation instructions which are contained in the *docs* subfolder. You should read the Installation notes first before proceeding.

You are strongly advised to take full backups of all the Checker and Bacstel objects before updating.
